Renown Group has been supplying its **fabrication and welding** services for over 25 years. This service has been applied to a vast array of projects for applications in the most demanding industries.

From defence projects, including almost every UK MoD land vehicle currently in service, to major oil and gas projects in the North Sea, Renown Engineering's fabrication and welding services have always delivered the quality and value upon which Renown has built its reputation.

### Fabrication and welding capabilities

Renown has expertise for producing complex, high integrity, safety critical fabrications.

Our facilities and large capacity equipment are tailored to producing the majority of road transportable structures.

Our group workforce of over 50 fabrication and welding tradesmen, supported by a substantial Quality team of Inspectors, CSWIP / PCN II NDT technicians, Welding Engineers and Welding Co-ordinators.

Operating in accordance with global quality standard in ISO 3834-2 Renown group offer a high integrity welding services covering multiple sectors.

We hold a comprehensive suite of welding procedures in accordance with international standards including:

**BSEN 15614, AWS D1.1, ASME IX, NACE, API 1104, NORSOK M101.**

Approved welding procedures cover a varied material range. Including but not restricted to carbon steel, alloy steel, stainless steel, Armour steel, duplex, super duplex, aluminium and high strength steels. (RQT 690 > 960)

#### Welding processes:

#### **MIG, MAG (GMAW), FCAW, TIG (GTAW).**

Renown has a designated specialist welding facility for automated Butt welding (AGTAW) and CRA overlay welding (AGTAW).

We Provide full turnkey packages in corrosion resistant solutions from standard fittings to high integrity components for the most corrosive and hostile environments.

We work with our customers and end users to rapidly develop solutions for any application.

Client specific welding procedures are a common project requirement.
